

# Carbon Reduction Plan

Proof Digital Limited

Company number: 09519805

Publication date: 14 June 2026

## Commitment to achieving Net Zero

Proof Digital Limited is committed to achieving Net Zero emissions by 2050.

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and the associated guidance and reporting standard for Carbon Reduction Plans, and follows the requirements set out by the GHG Protocol Corporate Standard.

As a micro business, Proof Digital operates a remote-first delivery model with no owned premises, vehicles, or equipment beyond standard office technology. This Plan reflects emissions reporting that is proportionate to the size and operating model of the organisation.

## Baseline emissions footprint

Baseline emissions are the reference point against which emissions reduction can be measured.

*Baseline year: 2025/26 (1 April 2025 – 31 March 2026)*

*Reporting period: 1 April 2025 to 31 March 2026*

Proof Digital operates a remote-first model with one director and no employees, owned premises, vehicles, or plant. Emissions have been estimated using the published UK Government (DESNZ) greenhouse gas conversion factors for company reporting, applied on a proportionate basis appropriate to the size and structure of the organisation. Where actual utility or activity data becomes available, these estimates will be refined in future updates of this Plan.

Emissions Category	Baseline Emissions (tCO <sub>2</sub> e)
<b>Scope 1 (direct emissions)</b>	0.00 — no owned vehicles, plant, or combustion sources
<b>Scope 2 (purchased energy)</b>	0.00 — no separately metered business premises
<b>Scope 3: Business travel</b>	0.05 — occasional rail travel for client meetings
<b>Scope 3: Homeworking</b>	0.35 — estimated using DESNZ homeworking conversion factor for one director working from home full-time
<b>Scope 3: Waste</b>	0.01 — minimal office and IT equipment waste
<b>Total Emissions</b>	0.41

## Current emissions reporting

*Reporting year: 2025/26 (1 April 2025 – 31 March 2026)*

As this is the first reporting period since incorporation, the current emissions figures are the same as the baseline figures above. Future updates of this Plan will report current emissions against this established baseline.

Emissions Category	Current Emissions (tCO2e)
Scope 1 (direct emissions)	0.00
Scope 2 (purchased energy)	0.00
Scope 3: Business travel	0.05
Scope 3: Homeworking	0.35
Scope 3: Waste	0.01
<b>Total Emissions</b>	<b>0.41</b>

## Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets:

- Maintain a fully remote-first operating model, avoiding the emissions associated with commuting and commercial office space
- Prioritise rail and public transport over car or air travel for client engagements, where practicable
- Use cloud-based digital tools and paperless working practices to minimise resource consumption and waste
- Select suppliers and subcontractors who demonstrate their own commitment to Net Zero and environmental responsibility, where reasonably practicable

With a baseline footprint of 0.41 tCO2e, the largest source of emissions is homeworking energy use. We project that our total emissions will remain low and broadly stable as the business grows, with a target of keeping total emissions per director/employee below 0.5 tCO2e per year, and reaching Net Zero across all relevant Scope 1, 2 and 3 emissions by 2050.

## Carbon reduction initiatives completed and planned

The following environmental management measures have been adopted:

- Remote-first delivery model, eliminating the need for a commercial office and reducing commuting emissions to near zero
- Use of cloud hosting and SaaS tools rather than locally hosted infrastructure
- Digital-first document and communication practices to minimise printing and physical waste
- Annual review of this Carbon Reduction Plan to ensure it remains accurate and proportionate as the business grows

## Declaration and sign off

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

### Signed on behalf of the Supplier:

Name: Nural Ali

Position: Founder and Director
